

# GWA SYSTEM IMPROVEMENT PROJECT

## What is the GWA System Improvement Project?

The GWA System Improvement Project is the rehabilitation and replacement of the sewer line along Route 4 and Route 1, from Hagåtña McDonalds to Chamorro Village. The project includes the installation of 30-inch diameter sewer line, the installation of two new sewer manholes, the rehabilitation of sewer lines using a trenchless technology called Cure-In-Place-Pipe, and manhole rehabilitation throughout the route.

## What is the Project Timeline?

The GWA System Improvement Project was started in July 2019 and is slated to be completed by June 2020.

## How will this project benefit our island?

The GWA System Improvement Project will upgrade the central sewer collection system in Hagåtña by realigning the overall flow of the system thereby increasing the capacity of sewer collection.
