Northern Guam Lens Aquifer (NGLA) Monitoring System Expansion Project
 GWA Project No. W20-001-OEA
 IFB-03-ENG-2021
 RFI Response No. 1 to Contractor Inquiries

This Addendum and/or Response to Request for Information (RFI) is issued to modify the previously issued bid documents and/or given for informational purposes and to the extent the responses below modify the bid documents, please treat them as an amendment to the Bid. The following responses are in response to RFIs received.

	REFERENCE	QUESTION/INQUIRY AS SUBMITTED:	GWA RESPONSE:
1	SECTION 33 21 00 Monitoring Well General Requirements	1. Monitoring Well Surface Casing – Can we just install a 40-foot surface casing down to 38 feet and the 2-feet sticking above the concrete slab? The casing comes in 20-foot section. A 42-foot casing will require a welded 2 feet of casing.	The proposal to install a 40 ft casing down to 38 ft with the top 2 feet exposed is acceptable.
2	Section 00410 Bid Form	DOW-NWF1 – Screen length showed 297 LF. Can we make it 300 LF instead? This way we don't need to cut 3-feet on a 10-foot section of the screen that will lose the threaded end or order a customized 7-foot section. Or can make it 290 LF.	The screen length can be increased to 300 LF as proposed. (A reduction to 290 LF will not be acceptable).

Bidders are also notified to visit GWA website: www.guamwaterworks.org to ensure that addenda to the bid, answers to questions, and reminders are communicated to all bidders throughout the solicitation process.
