RFP Amendment No: 1
Request for Proposal No. RFP 2025-05 Collection Services

Notice to Prospective Offerors

The Guam Waterworks Authority (GWA) hereby issues the following amendment to RFP 2025-05, Collection Services:

Addition to Scope of Work – Inclusion of Other Receivables

In addition to the inactive water and wastewater service accounts described in the RFP, GWA will also refer for collection other categories of receivables due to GWA. These additional receivables are not related to standard utility services, but include, without limitation, receivables for:

- Repair or replacement of damaged GWA-owned assets (e.g., hydrants, meters, valves, fences, etc.),
- Enforcement fines and penalties,
- Miscellaneous service fees, administrative fees, and regulatory assessments,
- Insurance premiums

GWA refers approximately 20 accounts per year in these other receivable categories, with an approximate total value of \$100,000 annually.

These accounts will be referred periodically as receivables are finalized.

The Contractor shall apply all collection requirements, reporting obligations, and performance standards outlined in the RFP equally to these other receivables.

Offerors shall take into account these additional receivables in their proposals, methodologies, and pricing structures.

All other terms and conditions of RFP 2025-05 remain unchanged.

Miguel C. Bordallo, P.E.
General Manager
