IFB No. 2025-24 Pick-Up Truck 4x2 Access/Extra Cab 2-Door Response for Inquiries No. 2

This document addresses inquiries regarding IFB 2025-24. It provides clarifications and additional information for informational purposes. In the event that any responses result in modifications to the bid documents, they should be considered as amendments to the original IFB 2025-24.

	QUESTION/INQUIRY AS SUBMITTED:	GWA RESPONSE:
Questions from May 12, 2025		
1.	Body, page 7: Minimum bed length: 6' (72"): In light of the acceptance of crew cabs, the majority of crew cab trucks all have 5 to 5.5 ft. beds. Please amend to read: "Minimum bed length: 5' (60").	No, a minimum bed length of 6 feet is required for GWA crew vehicles. This specification is necessary to ensure the safe and efficient transport of pipes, tools, and other essential supplies commonly used in daily field operations. Shorter bed lengths would limit the crew's ability to carry standard-length materials, potentially leading to multiple trips, inefficient loading, or the need for alternative transport methods, ultimately affecting productivity and response time in the field.
2.	Also, note, page 6, description appears to require correction of IFB # as it currently reads: "Invitation for Bid Number: GWA 2025-22"	To amend the bid title on page 6 to now read as: "Invitation for Bid Number: GWA 2025-24"

Bidders are also notified to visit the GWA website: <u>www.guamwaterworks.org</u> to ensure that any addenda to the bid, answers to questions, and reminders are communicated to all bidders during the solicitation process.

Brett E. Railey, P.E.
